Free Smart Irrigation Controller Workshop

Learn what they are and how they can lower your water bill

Riverside, CA – High temperatures and longer days may wane with the close of summer, but overwatering often doesn't, and Western is looking to change this.

Fall is the time residents often forget to dial back their irrigation controller and end up paying for more water than their plants need. On Friday, Oct. 2 from 6 p.m. to 8 p.m. Western Municipal Water District will be hosting a free workshop on smart irrigation controllers and their unique features to prevent overwatering from happening.

The leading manufacturers of smart irrigation technology will present their latest products and take the mystery out of how to use them. Get answers for all of your questions straight from the source. Learn about rebate incentives that pay for a majority, if not all, of the cost of these devices. This event is open to everyone, and refreshments will be served. Please RSVP by going to <http://bitly/1NqzSJO> today.

Western Municipal Water District is located at 14205 Meridian Parkway in Riverside. Please contact Pam Pavela at 951.571.7236 with any questions.
